

### **Watering**

**Please water (3) times a day until yard is looking pretty and green •Then go to (1) time a day until you mow the first time •Graduate down to (1) time a week and continue throughout year (winter included) and water thoroughly (deep).**

**Hand Watering •This does not get even results. Please use some type of sprinkler.**

**Portable Sprinklers • Water until nice and wet • Move before puddling or running starts.**

**Automatic Sprinklers • Pop-up type set for (2-5) minutes • Rotary-type set for (7-15) minutes • Please keep an eye on how wet it is getting as times may vary due to water pressure and volume • If watering seems too wet or too dry, please adjust.**

### **Warranty**

- **Will warrant against washing from natural rain and run-off, except where gutters dump and bottom of ditch lines, also where massive washing of soil occurs on slopes: I can stick to soil, but cannot keep soil from washing!**
- **Will warrant germination and growth through first mowing (Bermuda); (Rye/Bermuda-only Rye is warranted in fall and both are warranted during the month of March). Centipede is warranted until 1” sprigs.**
- **Not responsible for weeds or weed growth. Not responsible for dirt work or dirt repairs.**

**\*If there is a problem, please contact me before 60 days from time of planting. After 60 days from planting, all warranties are void.**
